

cfu Channel Guide

Get the best picture on every TV

For the best picture quality, connect an HD set-top box or HD DVR to your HDTV. Tune the box to channel numbers in the **HD** or **SD** columns on the channel list at right. All of the HD channels in CFU's Basic Plus line-up come free with the box!

Your digital TV was not designed to display analog signals! When watching a digital TV without a set-top box, get a better picture by

tuning to the numbers in the **QAM** column on the channel list. Most HDTVs have a QAM tuner inside that will display these standard definition (SD) digital signals. Use your TV's channel scan feature to detect and save the QAM channels and delete the analog channels for easier surfing.

When watching an analog TV without a set-top box, tune to channels listed in the A (analog) column.

cfu Basic and Basic Plus Channels

A	QAM	BASIC CHANNEL	SD	HD
2	2.1	CBS (KGAN 2.1)	2	402
3	19.6	CW (KWKB 20.1)	3	403
