

# unexpected connectivity

## Go ahead. Be surprised.

Cedar Falls Utilities (CFU) can connect your 1 GBPS broadband service today at virtually any Cedar Falls location, with no wait time and no build-out fee.

CFU's external connections might surprise you. We peer with the three most highly connected networks in the world over diverse, one-hop fiber paths terminating in Chicago, Kansas City and Des Moines. Diversity in both transport paths and upstream networks means maximum reliability for your business. One hop to the POP means low latency on your CFU connection.

Do your bandwidth needs peak at 10 GBPS, or 100? Do you operate an Autonomous System that can peer with ours at a colocation facility? Do you want redundant connections at your facility and/or upstream?

We can do that. CFU will provide the transport path, bandwidth and/or

redundant design you need. Pricing and timing will depend on your requirements. We're out to surprise you with a solution that's faster, cheaper and more reliable than you'd expect.

**>1 Gig? Can do.**

## Gigabit broadband available city-wide from CFU FiberNet

- Internet services are provided through a gigabit passive optical network available city-wide.
- Scalable business connections up to 1 GBPS available same day with a phone call. Higher capacity connections readily available as custom solutions, with price and lead time determined by project requirements.
- External-facing network designed for maximum reliability and low latency. CFU peers with the three most highly connected networks in the world over diverse fiber paths terminating in three mid-west cities. Diversity in both transport paths and upstream providers protects service levels in the event of a fiber cut or service interruption at any upstream source.
- Standard service is 2x1 downstream to upstream. Symmetrical service available by request.

Service Plan	Speed DOWN/UP	Rate
FiberOffice Enterprise	1 GBPS x .5 GBPS	\$440
FiberOffice Ultra	500 x 250 MBPS	\$175
FiberOffice Plus	250 x 125 MBPS	\$ 93
FiberOffice	100 x 50MBPS	\$ 65

Higher capacity connections greater than 1 GBPS and point-to-point transport services are readily available as custom solutions. For a proposal contact Kent Halder at 319-268-5226.

- Point-to-point or point-to-multi-point connections readily available.
- Track record of more than 20 years as a broadband service provider.

## Reliable, affordable business electric, natural gas and water services

- Diverse generating facilities, both local and offsite, ensure robust and affordable power supply.
- Work directly with a CFU system planner for service designed to meet your power and metering needs.
- Three-phase power readily available.
- Discounts for businesses that take electric service at primary voltage, with customer ownership and operation of transformers and substation equipment.
- We accommodate customer-owned back-up generation and offer interruptible rates.
- Net metering available for customer-owned renewable energy installations.
- Energy efficiency consulting services and cash incentives for demand and energy use reduction projects.
- Competitive electric and natural gas rates; see tariffs online at [www.cfu.net/terms](http://www.cfu.net/terms).
- Gas commodity purchasing program available for high demand natural gas customers.
- Abundant municipal water supply sourced from deep wells, with water rates among the lowest in Iowa and the Midwest.
