

2019 Rebate Changes

Cedar Falls Utilities will be changing its requirements for HVAC rebates in 2019 in an effort to simplify the application process while ensuring quality installations.

Primary Changes

- The HVAC SAVE® online platform and requirements will not be used in the 2019 program year.
 - Your HVAC contractor will still be required to perform quality checks. The measurements will be recorded directly on the rebate application form.
- The 2019 central air conditioner rebate will have a single amount of \$350 with a minimum requirement of SEER 16.
- The 2019 natural gas furnace rebate will require a 95% AFUE or greater and ECM blower – the rebate will be \$200.
-

From now until December 31, 2018

- Equipment installed in the 2018 program year will need to adhere to 2018 rebate requirements in order to receive a rebate – this includes HVAC SAVE® requirements.
